L. TODD SPENCER | THE VIRGINIAN-PILOT

Vice President Joe Biden said Norfolk State University will be at the center of a \$25 million cybersecurity training effort.

BIDEN VISITS NSU TO UNVEIL TECH JOB TRAINING PROGRAM

By Mike Hixenbaugh | The Virginian-Pilot

Vice President Joe Biden visited Norfolk State University on Thursday to highlight a program that will give historically black colleges and universities millions of dollars to train students for jobs in cybersecurity.

NSU will be the lead campus in a new consortium that will include 12 other historically black colleges, two national research labs and a school division in South Carolina, Biden announced during the visit. He was joined by Gov. Terry McAuliffe, U.S. Rep. Bobby Scott, Energy Secretary Ernest Moniz and other officials.

The Department of Energy will supply

the national cybersecurity consortium with \$25 million in grants over the next five years, part of the Obama administration's effort to train more workers for jobs protecting the nation's computer networks from attacks.

The threat offers both a problem and an opportunity, said Biden, whose quick visit snarled midday traffic between Norfolk Naval Station, where his plane landed, and NSU.

The massive hack at Sony several weeks ago underscored

hackers, then develop a way to block them.

NSU, which offers a master's degree in cybersecurity, is already a leader in the field, Biden told the classroom of mostly black students.

"You guys are the vanguard; we need badly for you guys to stick with it and attract other minorities," Biden said. "It's not because we're trying to be socially correct. It's because it's a wasted asset."

The federal money will be used to buy computers, train instructors and connect students with internships. Biden told the students they'll make

Three Colleges, Five Schools, 29 Academic Departments

- College of Liberal Arts
- College of Science, Engineering, and Technology
- Honors College
- School of Business
- School of Education
- School of Social Work
- School of Graduate Studies and Research
- School of Extended Learning

Degree Offerings

- 1 associate's degree
- 30 bachelor's degrees
- 16 master's degrees
- 3 doctoral degrees

Regional Accreditation: Southern Association of Colleges and Schools
NSU has also earned accreditation for every eligible program

NSU has significant strengths in STEM-H including:

- New Programs
 - M.S. in Cybersecurity (online)
 - B.S. in Information Technology
- Accredited STEM-H Programs:
 - Chemistry
 - Computer Science
 - Engineering
 - Nursing
 - Technology
- Research and Grants

Cybersecurity Consortium

bersecurity nsortium

- NSU leads a \$25M collaborative effort to develop a K-20 pipeline for the cybersecurity workforce.
- Project will pilot a workforce development program to produce well-qualified cybersecurity professionals in significant numbers to address the pressing cybersecurity workforce shortage.
